One of the most revolutionary parts of the new iMac is its price tag. For about the same price as CRT-based PCs, the new iMac is designed around a stunning 15" flat screen, and features a blazing-fast G4 processor, the remarkable OS X operating system and Apple's award-winning suite of software for digital photography, movies and music. Learn more at apple.com. Or visit one of our new Apple stores in your neighborhood, or your nearest authorized Apple reseller.

Introducing iPhoto. Shoot like Ansel. Organize like Martha.

Digital cameras are revolutionizing the way we take pictures. Now, Apple provides the missing link to revolutionize the way we save, organize, share and enjoy them.

Just plug your camera* into iMac's USB port and iPhoto automatically imports your photos, catalogs them, stores them and displays them on your screen. Simply drag your mouse, and iPhoto magically grows or shrinks your photos right before your eyes. So you can view individual shots in greater detail for precise cropping. Or see hundreds of photos on the screen at once — and quickly scroll through thousands to find the one you're looking for. Gone are the days of scavenger hunts to find pictures on your hard drive.

FIRST YEAR FOR DIGITAL DARKROOM!!

Kodak EasyShare

digital camera

CX4200

digital camera

The EasyShare system. One touch. That's all it takes to get pictures from your Kodak EasyShare digital camera to your computer, and to share those pictures with everyone you know.

Take pictures, tag them right on the camera with our exclusive Share feature, place the camera in the dock and touch the button (dock and rechargeable battery pack sold separately). Your pictures are automatically sent to your computer, and those you tagged are ready to be printed and e-mailed. It's never been easier to get high-quality prints from a digital camera, or send pictures over e-mail.

The dock will also quickly recharge your camera's battery pack, so you'll always be ready to shoot and share pictures with the world.
